Summer Reading

Ms. Googins

Research studies have shown that children who don't read during the summer months can lose up to three months of reading progress! Students who choose to read, or are read to, are exposed to 1.8 million words per year to help them build their vocabulary and meaning. Students who read for 20 minutes a day are also likely to score better than 90% of their peers on standardized tests.

Our rising Kindergarteners are encouraged to spend time with books every day. Students may read independently or with an adult for 20 minutes each day. Please refer to the list of children books included below if you need some book titles to kick off your summer reading! Color in a seashell for every 20 minutes that are read in a day.
